

**I Claim:**

1. A shanty comprising:

a plurality of walls defining a room having an interior wherein each of the walls has a length defined between a first end and a second end and a width defined between a third end and a fourth end wherein a section of each of the walls at the first end extends into the interior of the room; and

a plurality of roof panels defining a ceiling for the room wherein each of the roof panels has a length defined between a first end and a second end and a width defined between a third end and a fourth end wherein a section of each of the roof panels at the first end extends into the interior of the room and further wherein the section of one of the walls extending into the interior is attached to the section of one of the roof panels extending into the interior wherein the plurality of walls and the plurality of roof panels attach to define the room.

2. The shanty of Claim 1 further comprising:

a fastener attaching the wall to the roof panel.

3. The shanty of Claim 1 wherein the length of one of the roof panels is equal to twice the width of one of the walls.

4. The shanty of Claim 1 further comprising:

a post attached to one of the plurality of roof panels.

5. The shanty of Claim 1 further comprising:

a brace attached to one of the plurality of walls and one of the plurality of roof panels.

6. The shanty of Claim 1 wherein a section of each of the plurality of walls at the third end is folded into the interior of the room.

7. The shanty of Claim 1 further comprising:

a hole formed within the section of the wall extending into the interior of the room.

8. The shanty of Claim 1 further comprising:

a slot formed within the section of the roof panel extending into the interior of the room.

9. The shanty of Claim 1 wherein the walls are constructed from metal.

10. A system comprising:

a plurality of wall panels defining a room wherein each of the wall panels has a length defined between a first end and a second end and wherein a section of each of the wall panels at the first end extends toward the second end of the wall panel;

a roof panel contacting the plurality of wall panels at the first end to provide a ceiling for the room wherein the roof panel has a length defined between a first end and a second end wherein a section of the roof panel at the first end extends toward the second end of the roof panel; and

a fastener attaching one of the wall panels to the roof panel wherein the section of the wall panel extending toward the second end of the wall panel is attached to the section of the roof panel extending toward the second end of the roof panel.

11. The system of Claim 10 further comprising:

a post attached to the roof panel.

12. The system of Claim 10 further comprising:

a slot formed within the section of the wall panel.

13. The system of Claim 10 further comprising:

a slot formed within the section of the roof panel.

14. The system of Claim 10 wherein the roof panel is defined by a plurality of removably attached sections.

a door positioned adjacent to one of the wall panels.

15. The system of Claim 10 further comprising:

a handle attached to the wall panel.

16. The system of Claim 10 further comprising:

a hinge attached to the wall panel.

17. The system of Claim 10 further comprising:

a brace attached to one of the plurality of wall panels and the roof panel.

18. A method for assembling a shanty having an interior, the method comprising the steps of:

providing a plurality of walls defining a room having an interior wherein each of the walls has a length defined between a first end and a second end wherein a section of each of the walls at the first end extends into the interior of the room;

providing a roof panel defining a ceiling for the room wherein the roof panel has a length defined between a first end and a second end wherein a section of the roof panel at the first end extends into the interior of the room; and

fastening one of the plurality of wall panels to one of the plurality of roof panels.

19. The method of Claim 18 further comprising the step of:

attaching a post to the roof panel.

20. The method of Claim 18 further comprising the step of:

attaching a hinge to one of the plurality of wall panels.
